Up to 32 Users

Individual or multiple pagers for home or care settings

Peace of Mind

Reassuring backup to know that calls are not ignored

Activation

Compatible with a variety of activation methods

Medical Equipment

An interface to connect to different monitoring devices such as oximeters and respirators

How does it work?

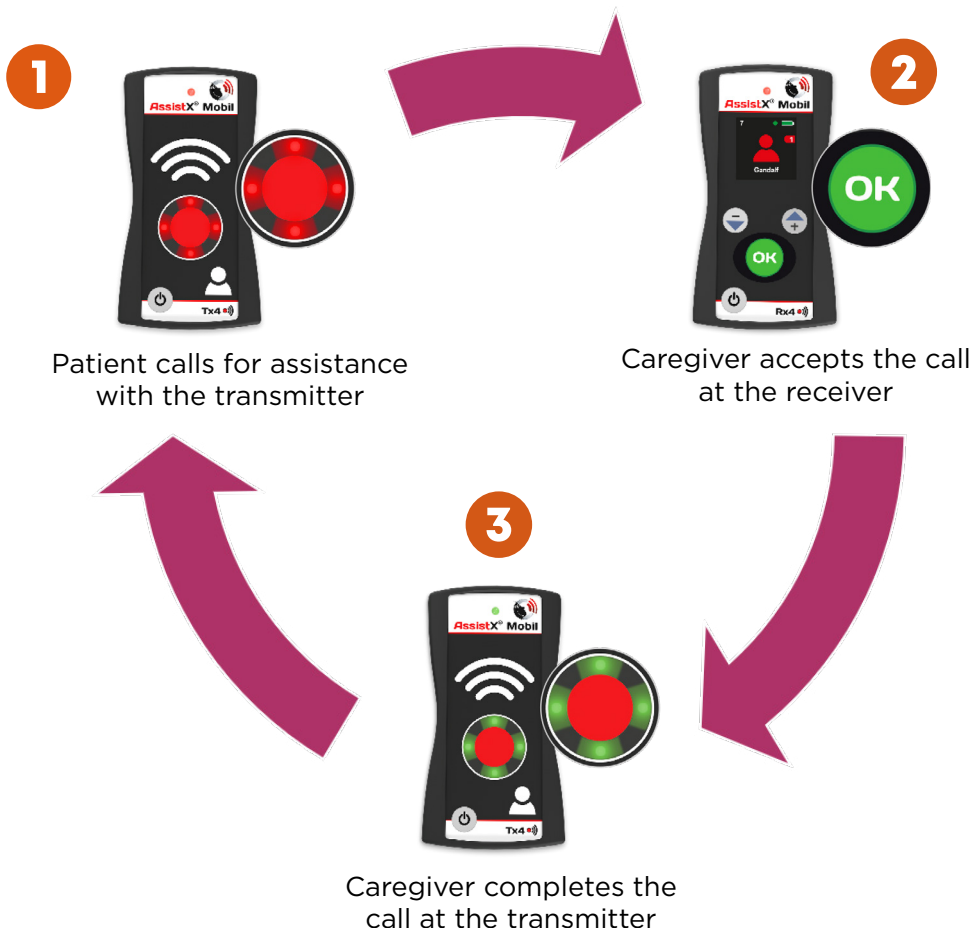

The Assist X Mobil is a wireless call pager system, designed to ensure the safety of individuals in a home or residential care setting. With a setup time of less than 5 minutes*, this system is suitable for both individual to multiple device usage.

The Assist X Mobil can be connected to special monitoring sensors and home control devices for users living with more severe conditions, allowing a distress call to be triggered to a caregiver or family member.

The system can be expanded for use in care environments to monitor up to 32 individuals, with multiple pager receivers for staff members.

*for single usage

Usage Example

Activation Methods

The Assist X can be used in conjunction with a range of accessibility switches, monitoring sensors and home control devices*

Switches

Remote controllers

Proximity sensors

Sound activation

Emfit Epilepsy

Emfit Bed/chair

*examples only - this list is not exhaustive.

Designed to Suit You

Care Settings

A high provision of support is often required within care settings due to the variety of conditions and abilities of residents. The Assist X Mobil system ensures that residents retain a level of independence, improve their quality of life whilst simultaneously freeing up time for care staff.

Individual Clients

We understand the unique requirements of every client and can provide the best advice on how to support your needs; whether you're an individual or family member, rest assured we can help.

Advice & Care

Our team of experienced engineers are on hand to install and maintain a variety of assistive technology devices to support individuals and quality of life.

We start by carrying out a detailed assessment to identify the ideal solution for the client, while guiding them using these simple **three steps**:

Step 1 - Assessment

A Steeper engineer will discuss your requirements and identify the appropriate solution.

Step 2 - Installation

We will guide you through the use and applications of the equipment.

Step 3 - Support

We provide optional service and maintenance support as part of your aftercare package.

The Assist X Mobil helps provide the best possible care through continuous monitoring; whilst providing safeguarding interventions by alerting the carer or family member when something's not right.

For more information on the Assist X Mobil, including any compatible accessories, or to order, please contact assist@steepergroup.com or call **0113 207 0449**.
