

Assistive Technology Gilgen mechanism control booklet

# Swing door drive mechanism control booklet

# Gilgen FD20

Date of installation Reference number_
--

This control booklet should be kept close to the installation, together with the operating instructions and only to be completed by an authorised technician.

#### Competent specialists

Competent specialists are persons who, based on their professional training and experience, have sufficient knowledge in the field of powered windows, doors and gates. They are sufficiently familiar with the relevant regulations for work protection and accident protection, with the guidelines and generally recognised rules applicable for this field of technology which enables them to evaluate if powered windows, door and gates can be safely operated.

Only the trained experts of the manufacturer or the supplier are counted among these persons.

#### Safety regulations

The design and manufacture of this door operator fully answers the safety requirements to be met by door systems powered by an external energy source.

A professional installation as well as regular servicing (maintenance/checking) are decisive factors with regard to a safe operation of the automatic door. To guarantee the required safety level, only sufficiently qualified and expert staff members respectively duly authorised specialised companies are commissioned to install and service (maintenance/checking) the automatic door systems.

In order to guarantee the safety of the users at all times, the installation must be checked with regard to its safe condition before the first commissioning and during normal operation, at least once a year, by a competent specialist. The correct service (maintenance/checking) must be confirmed by entering the date and signature into this control booklet.
