Xtend Foot | Lindhe Xtend

Waterproof

Max 150kg

Weight Limit

Up to K3

Activity Level

Developed in close collaboration with users, prosthetists and universities, the Xtend Foot is the first product from Swedish company, Lindhe Xtend and is a patented prosthetic foot. The aim of the design was to produce a foot “which functions to all intents and purposes like a real foot”. The result is this unique product which combines a high degree of Inversion/eversion to compensate for uneven surfaces during walking, with a controlled, but significant range of dorsiflexion/planterflexion, with good energy return.

The C-shaped heel spring is also bonded between the posterior of the forefoot element and the sole plate and provides excellent shock absorption at heel strike. This system controls the foot’s natural movement, working together to produce a strong and durable structure, providing optimum energy return, and at the same time keeping the foot compact and light.

Features and Benefits:

- Adapts to uneven surfaces through its lightweight, flexible structure
- +/- 17° of Inversion and eversion
- Enables a more natural gait on slopes and inclines
- Strong and effective energy return in every step
- Maximum patient weight - 150kg
- Waterproof* in fresh, chlorinated and salt water
- **3 year warranty** (foot shell - 6 months)
- **30 day trial period**

* Rinse immediately with fresh water and dry following exposure to salt water or chlorinated water

About Lindhe Xtend

Christoffer Lindhe was just 17 years old when he lost both legs and an arm in a railway accident in 2006, surviving against all the odds.

Christoffer enjoyed being outdoors and didn't want to depend on a wheelchair to manoeuvre. In partnership with orthopaedic technicians and universities, he started to develop his own foot prosthesis. The development resulted in the creation of the **Xtend Foot**, a prosthetic foot with greater lateral flexibility.

This development ultimately created Lindhe Xtend. The company was founded in 2013 and since then have developed two innovative product lines; the Xtend Foot and Xtend Connect Components. Partnering with Steeper as their exclusive distributor for the Xtend ranges in the UK

XTEND FOOT

By Lindhe Xtend

Waterproof

Effective shock absorption

Laminate base provides strength and effective energy return

+/- 17° of Inversion and eversion

Universal pyramid adapter

Specially designed fibre composite forefoot

Lightweight

Split toe ensures flexibility and stability

Key Features

Ground Compliance

The foot offers +/- 17 degrees of Inversion and eversion, making lightwork of uneven surfaces and tricky obstacles such as stairs and slopes.

Effective Energy Return

After being stored at heel strike, energy is gradually released during the toe-off phase for an effective energy return. The foot houses a low centre of gravity for excellent stability.

Material Combination

Full ground contact is achieved with the Xtend foot's flexible glass fibre keel and ultra-thin carbon fibre soleplate, all without compromising adaptability.

Waterproof*

Whether it's a chlorinated, fresh or salt water, the Xtend's build design gives full protection from all.

Ordering Information

Trial Period - This foot has a 30 day trial period.

Weight Limit (kg)	Foot Size (cm)						
	23	24	25	26	27	28	29
60 kg	NH100-323	NH100-324	-	-	-	-	-
