# Victor™ Knee

The Victor™ Knee by College Park is a single-axis pneumatic knee joint, that can be adjusted to suit both slow and fast paced walking, suitable for low to moderate activity users. The knee features an adjustable weight-activated friction brake that can be adjusted to control stance phase, making it ideal for patients who want to increase their activity level post-rehabilitation.

Prosthetists can fine-tune the device according to patient preferences, and customise the pneumatic flexion and extension resistance for optimal movement.

Features and Benefits

- Economical option that enables users to feel confident

- Weight-activated friction brake and a small degree of stance flexion offers adjustable stability during stance phase

- Integrated extension assist ensures full extension with every step

- Pneumatic swing phase control accommodates gait across varying walking speeds

- Clinicians can easily adjust the knee to suit the user's preferences using a standard hex key

Easily adjusted features   Integrated friction brake
